# 740 SPORT

## Designed to go fast

The FARR 740 Sport was developed to satisfy market enthusiasm for a high performance "go fast" one design lift-keel yacht capable of winning line honours against similar sized boats and also to be highly competitive under JOG rating. The 740 Sport is an exciting boat to sail with excellent performance in all conditions. She is a dream to handle in strong fresh winds and can be driven hard with complete confidence.

## Design principle

The 'Sport' principle has resulted in a design fully equipped to current race yacht standards, including a twin spreader rig with running backstays, large cockpit and complete sheeting adjustments. Gear and equipment for the boat has

been carefully planned at the design and production prototype stages. The result is a simple yacht offering a well-resolved and complete range of rig adjustment enabling the enthusiast to enjoy the latest developments at a moderate cost.

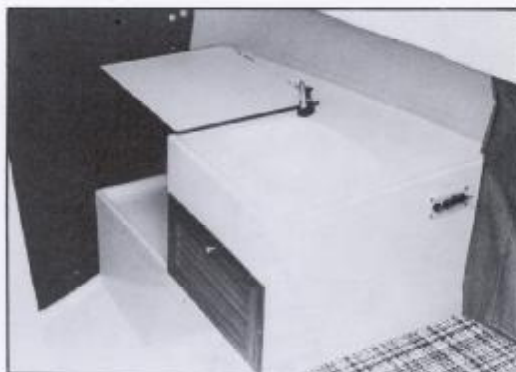

## Construction

SEA NYMPH BOATS LTD, builders of more than 7000 GRP boats has in conjunction with Bruce Farr, developed a highly sophisticated construction layup for the 740 Sport using woven and unidirectional rovings with core materials of 'Klegecell' foam in the deck and 'Firet' coremat in the hull. The result is a light, extremely strong boat of high standard.

## Go fast in comfort

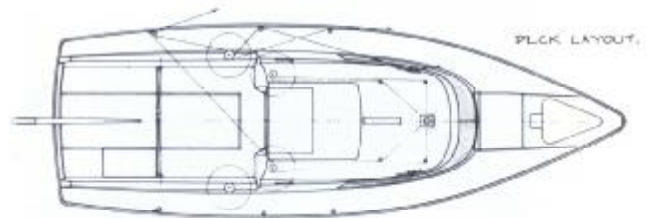

Despite the attention to race-winning design the yacht has four full-size berths. Two can convert to a double-berth if required. There's room, too, for an additional quarter berth. The galley has a sink with storage below, an icebox and an area for a two-burner gimbaled stove. The toilet area is forward of the bulkhead for privacy and easy access. Storage is copious with lockers under all berths and huge areas aft for sail storage. The cockpit has a locker for outboard fuel tank and another gear locker. The combination sliding main hatch/pop top allows lots of headroom. The wrap-around window lets in plenty of light and allows a wide view. The large forward hatch gives easy access and ventilation and there's a locker forward for anchor storage. The cockpit is large for comfortable cruising and the wide side decks are a comfort boon for the crew men when out racing.

## Built to last

Bruce Farr — one of the world's top yacht designers. Sea Nymph Boats Ltd — the largest yacht manufacturer in the Southern Hemisphere. They offer boats with a high standard of finish, service and an excellent 12-month warranty.
